

# Make a Bat-nana Split!

Fruit and nectar eating bat of the southwest United States pollinate many trees that give us great tasting fruit.

Here is a treat you can enjoy, in honor of those bats. Bats pollinate the plants of all these fruits. Other bat-pollinated foods include avocado, figs and dates!

## Ingredients:

- Banana
- Vanilla ice cream
- Mango, canned or fresh chunks
- Papaya, canned or fresh chunks
- Peaches, canned or fresh chunks
- Carob chips
- Cashews, chopped

Slice banana lengthwise and place each half in serving dish.

Top with 3 scoops of vanilla ice cream along the length of the banana halves.

Top ice cream with chunks of mango, papaya, and/or peaches. Sprinkle carob chips and chopped cashews over all.

Enjoy!
